Acme Corporation

RE: Career Change Devops Engineer

Dear Hiring Manager,

I am excited to apply for the Career Change Devops Engineer position at Acme Corporation as advertised on LinkedIn. With a strong background in software development and a passion for automation and systems optimization, I am eager to pivot my career into DevOps and contribute to your team's success.

In my previous role as a Software Developer at Tech Innovations, I successfully led a project to automate the deployment process using Jenkins, which reduced the deployment time by 40% and improved the reliability of our releases. Additionally, I collaborated closely with the QA team to implement continuous integration practices, resulting in a 30% decrease in post-deployment defects. My experience in scripting with Python and Bash, combined with my understanding of cloud platforms like AWS, positions me well to effectively contribute to Acme Corporation's DevOps initiatives.

I am particularly drawn to this role at Acme Corporation due to your commitment to innovation and excellence. I am eager to bring my technical skills and my proactive approach to problem-solving to your team. I am confident that my unique blend of development experience and my dedication to continuous improvement will allow me to make a meaningful impact.

I would love the opportunity to discuss my qualifications further and explore how I can contribute to the exciting projects at Acme Corporation. Thank you for considering my application; I look forward to the possibility of working together.

Sincerely,

Jordan Lee Thompson
