Acme Corporation

RE: Career Change Microbiologist

Dear Hiring Manager,

I am writing to express my enthusiasm for the Career Change Microbiologist position at Acme Corporation, as advertised on your careers page. With a strong background in laboratory research and a passion for microbiology, I am excited about the opportunity to contribute to your esteemed team and further my career in this essential field.

During my previous role as a laboratory technician at BioHealth Labs, I successfully implemented a quality control system that reduced contamination incidents by 40%. This experience not only honed my analytical skills but also ignited my interest in microbial processes and their implications in health and safety. Additionally, I spearheaded a project focused on environmental microbiology, where I collaborated with a multidisciplinary team to assess microbial diversity in local water sources. This project not only enhanced my technical skills in microbiological testing but also reinforced my commitment to using science to improve public health.

I am particularly drawn to Acme Corporation's commitment to innovation and research excellence. I am eager to bring my analytical mindset and problem-solving abilities to your microbiology team. I am confident that my hands-on experience combined with my dedication to learning more about microbial sciences make me a strong candidate for this role. I look forward to the opportunity to discuss how my background and skills align with the goals of Acme Corporation.

Thank you for considering my application. I am excited about the possibility of contributing to your team and would welcome the chance to discuss my candidacy further.

Sincerely,

Jessica L. Harrington
