Acme Corporation

RE: Career Change Ruby Developer

Dear Hiring Manager,

I am excited to apply for the Career Change Ruby Developer position at Acme Corporation, as advertised on LinkedIn. With my background in software engineering and a newfound passion for Ruby development, I am eager to bring my skills and unique perspective to your innovative team.

During my previous role as a Software Engineer at Tech Solutions Inc., I successfully led a project that transformed a legacy application into a modern, scalable web service. By migrating the existing codebase to Ruby on Rails, we improved application performance by 40%, significantly enhancing user experience. Additionally, I collaborated closely with cross-functional teams to implement Agile methodologies, which streamlined our development processes and reduced project delivery times by 30%. My ability to adapt quickly and learn new technologies was further demonstrated when I took the initiative to develop an internal Ruby-based tool that automated repetitive tasks, saving my team over 15 hours a week.

I am particularly drawn to Acme Corporation's commitment to leveraging technology for impactful solutions. I am eager to contribute my analytical skills and collaborative mindset to your team, ensuring that we not only meet but exceed project expectations. I would love the opportunity to discuss how my background, combined with my passion for Ruby development, aligns with the goals of Acme Corporation. Thank you for considering my application; I look forward to the possibility of discussing this exciting opportunity further.

Sincerely,

Jordan Taylor
