Acme Corporation

RE: Career Change Rust Developer

Dear Hiring Manager,

I am excited to apply for the Career Change Rust Developer position at Acme Corporation, which I discovered on LinkedIn. With a background in software engineering and a recent focus on Rust programming, I am eager to bring my skills and passion for systems programming to your innovative team.

In my previous role as a Software Engineer at Tech Solutions, I successfully led a project that involved migrating legacy systems to a more efficient architecture, resulting in a 30% reduction in processing time. During this project, I utilized Rust to enhance the performance and safety of our applications, which significantly improved our codebase's reliability. Additionally, I contributed to an open-source Rust library that streamlined data processing for various applications, garnering over 500 stars on GitHub. This experience allowed me to deepen my knowledge of Rust's unique features and best practices while collaborating with a community of developers.

I am particularly drawn to Acme Corporation's commitment to cutting-edge technology and collaborative culture. I am eager to leverage my technical skills and project management experience to contribute to your team. I would appreciate the opportunity to discuss how my background and recent training in Rust can be an asset to your projects. Thank you for considering my application; I look forward to the possibility of discussing this exciting opportunity further.

Sincerely,

Jordan McKenzie
