Acme Corporation

RE: Career Change Software Engineer

Dear Hiring Manager,

I am excited to apply for the Career Change Software Engineer position at Acme Corporation, which I found listed on your careers page. With a solid background in project management and a passion for technology, I am eager to transition my skills into software engineering and contribute to Acme's innovative projects.

During my previous role as a Project Manager at Tech Solutions Inc., I successfully led a cross-functional team to develop a customer relationship management (CRM) tool that improved client satisfaction scores by 25%. My ability to translate complex technical requirements into actionable project plans not only streamlined the development process but also ensured that the final product met all user needs. This experience ignited my enthusiasm for software development, prompting me to pursue coding bootcamps where I honed my programming skills in Java and Python.

Additionally, while volunteering for a local non-profit, I collaborated with a team of fellow developers to create a web application that streamlined the donation process, increasing contributions by 40% within three months. This project not only allowed me to apply my coding skills but also reinforced the importance of user experience and agile development methodologies. I am eager to bring this hands-on experience and collaborative spirit to Acme Corporation as I transition into a full-time software engineering role.

I am very enthusiastic about the opportunity to join your team and contribute to the exciting projects at Acme Corporation. I would love the chance to discuss how my background in project management, combined with my technical skills, can benefit your team. Thank you for considering my application; I look forward to the possibility of speaking with you soon.

Sincerely,

Jordan T. Reynolds
