Acme Corporation

RE: Career Change Terraform Engineer

Dear Hiring Manager,

I am excited to apply for the Career Change Terraform Engineer position at Acme Corporation, as advertised on your careers page. With a strong background in software development and a newfound passion for infrastructure as code, I am eager to leverage my skills and contribute to your innovative team. Acme's commitment to adopting cutting-edge technologies and fostering a collaborative environment aligns perfectly with my career aspirations.

In my previous role as a Software Developer at Tech Solutions, I led a project that successfully automated the deployment of our web applications using Python and Docker, achieving a 40% reduction in deployment time. This experience sparked my interest in infrastructure management, leading me to explore Terraform as a powerful tool for managing cloud infrastructure. Additionally, I completed a certification in Terraform and implemented a small-scale project where I provisioned and managed a multi-tier application on AWS. This project not only honed my Terraform skills but also deepened my understanding of cloud architecture, which I believe is crucial for the Terraform Engineer role.

I am particularly drawn to Acme Corporation's focus on continuous integration and delivery, and I am eager to bring my problem-solving abilities to your team. I am confident that my background in software development, combined with my recent training in Terraform, will allow me to contribute effectively to your infrastructure projects. I would love the opportunity to discuss how my skills and experiences align with the needs of your team. Thank you for considering my application, and I look forward to the possibility of contributing to Acme Corporation.

Sincerely,

Jordan M. Thompson
