Acme Corporation

RE: Entry Level Backend Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level Backend Developer position at Acme Corporation, as advertised on LinkedIn. With a solid foundation in backend development and a passion for creating efficient and scalable applications, I am excited about the opportunity to contribute to your innovative team.

During my studies at State University, where I earned a Bachelor's degree in Computer Science, I completed a capstone project that involved developing a RESTful API for a local e-commerce startup. This experience allowed me to hone my skills in Java and Spring Boot, as I successfully implemented user authentication, optimized database queries, and ensured data integrity using PostgreSQL. Additionally, I interned at Tech Solutions, where I collaborated with senior developers to enhance existing codebases. My key achievement there was refactoring a critical microservice that improved response times by 30%, resulting in a smoother user experience for thousands of customers.

I am particularly drawn to Acme Corporation's commitment to leveraging technology to drive business solutions. I am eager to bring my technical skills and proactive approach to your team, where I can contribute to backend solutions that align with your company's goals. I am excited about the possibility of discussing how my background, skills, and enthusiasms align with the needs of your team. Thank you for considering my application for this position.

Sincerely,

Jordan Smith
