Acme Corporation

RE: Entry Level Biomedical Engineer

Dear Hiring Manager,

I am excited to apply for the Entry Level Biomedical Engineer position at Acme Corporation, as advertised on your careers page. With my recent graduation from the University of California, Berkeley, where I earned my Bachelor of Science in Biomedical Engineering, I am eager to contribute my skills and enthusiasm to your innovative team. I am particularly drawn to Acme Corporation due to its commitment to developing cutting-edge medical devices that improve patient outcomes.

During my academic career, I completed a capstone project focused on designing a cost-effective prosthetic limb that utilized lightweight materials without sacrificing functionality. This project not only honed my technical skills in CAD software and materials science but also allowed me to collaborate with a multidisciplinary team to create a prototype that received high praise during our final presentation. Additionally, I completed an internship at MedTech Innovations, where I assisted in the development of a wearable health monitoring device. My role involved conducting user testing and collaborating with engineers to analyze data, which ultimately contributed to a 15% increase in user satisfaction based on feedback collected.

I am particularly impressed by Acme Corporation's recent advancements in non-invasive diagnostic technologies and am eager to bring my background in biomedical engineering and my passion for innovation to your team. I look forward to the opportunity to further discuss how my skills and experiences can contribute to your projects. Thank you for considering my application; I hope to speak with you soon.

Sincerely,

Jordan A. Smith
