Acme Corporation

RE: Entry Level Energy Engineer

Dear Hiring Manager,

I am excited to apply for the Entry Level Energy Engineer position at Acme Corporation, which I discovered on your careers page. With a strong academic background in Energy Engineering and hands-on experience through my internship at GreenTech Solutions, I am eager to contribute to your team and assist in developing innovative energy solutions that align with Acme's commitment to sustainability and efficiency.

During my internship, I successfully collaborated on a project that involved analyzing building energy usage patterns, where I identified inefficiencies that, once addressed, resulted in a 15% reduction in energy consumption. Additionally, I led a team in the design of a solar panel integration plan for our campus, which not only enhanced our renewable energy sources but also provided a practical model for future installations. These experiences honed my analytical skills and equipped me with a strong foundation in energy systems management.

I am particularly impressed by Acme Corporation's initiatives in renewable energy technologies and its commitment to reducing carbon footprints. I am eager to bring my knowledge of energy-efficient designs and my proactive approach to problem-solving to your team. I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan A. Collins
