Acme Corporation

RE: Entry Level Full Stack Developer

Dear Hiring Manager,

I am excited to apply for the Entry Level Full Stack Developer position at Acme Corporation, as advertised on LinkedIn. With a strong foundation in web development and a passion for creating efficient software solutions, I am eager to contribute to your team and help drive innovative projects at Acme.

During my academic career at State University, I completed a capstone project where I led a team of four in developing a full-stack web application for a local non-profit organization. We utilized React for the front end and Node.js with Express for the back end, successfully enhancing the organization's online presence and increasing user engagement by over 30%. Additionally, I interned at Tech Solutions, where I contributed to a cross-functional team that revamped an existing e-commerce platform. My role involved optimizing the user interface and integrating new features, resulting in a 20% increase in sales conversion rates over three months.

I am particularly drawn to Acme Corporation's commitment to innovation and user-centered design. I am eager to bring my skills in JavaScript, HTML, CSS, and database management to your projects. I am confident that my proactive approach and ability to learn quickly will allow me to make a meaningful contribution to your development team.

I would love the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application. I look forward to the possibility of contributing to your team and am excited about the chance to grow within your esteemed company.

Sincerely,

Jordan Taylor
