Acme Corporation

RE: Entry Level Game Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level Game Developer position at Acme Corporation, as advertised on your careers page. With a strong passion for gaming and a solid foundation in game design and programming, I am excited about the opportunity to contribute to your innovative team and help create engaging experiences for players.

During my time at university, I led a team project where we developed an indie game that received recognition in the university's annual showcase. I was responsible for designing the game mechanics and implementing them using Unity and C#. This project not only honed my technical skills but also taught me the importance of collaboration and clear communication within a development team. Additionally, I completed an internship at a small game studio where I assisted in debugging and optimizing a mobile game. My efforts contributed to a 20% increase in performance, showcasing my ability to deliver results under tight deadlines.

I am particularly drawn to Acme Corporation because of your commitment to innovation and quality in game development. I am eager to bring my skills in programming and game design to your team, and I am excited about the possibility of contributing to projects that push the boundaries of interactive entertainment. I would love the opportunity to discuss how my background, skills, and enthusiasm for gaming can align with the goals of Acme Corporation.

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you further.

Sincerely,

Jordan Taylor
