Acme Corporation

RE: Entry Level Industrial Designer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level Industrial Designer position at Acme Corporation, as advertised on your careers page. With a solid foundation in design principles and a passion for innovative problem-solving, I am excited about the opportunity to contribute to your team and help create products that resonate with users and enhance their experiences.

During my time at university, I completed an internship with XYZ Design Studio, where I collaborated on a project to redesign a popular kitchen tool. My contributions included developing 3D models and prototypes that improved functionality based on user feedback. This hands-on experience not only honed my technical skills in CAD software but also taught me the importance of iterative design processes and user-centered design principles. Additionally, I was part of a team that won an award for our sustainable packaging design at the National Design Competition, which further ignited my passion for sustainable practices in industrial design.

I am particularly drawn to Acme Corporation's commitment to innovation and sustainability, as I believe these values are crucial in today's design landscape. I am eager to bring my unique perspective and dedication to your team, where I can learn from experienced designers and contribute to projects that make a positive impact. I look forward to the possibility of discussing how my background, skills, and enthusiasm align with the goals of Acme Corporation.

Thank you for considering my application. I would welcome the opportunity to discuss my candidacy further and explore how I can contribute to your team. I look forward to hearing from you soon.

Sincerely,

Jordan Lee Thompson
