Acme Corporation

RE: Entry Level Platform Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level Platform Engineer position at Acme Corporation, as advertised on your careers page. With a strong foundation in software development and a passion for platform engineering, I am excited about the opportunity to contribute to your team and support the innovative projects at Acme.

During my time at university, I successfully led a capstone project where I designed and implemented a cloud-based application that streamlined data processing for a local non-profit. This experience honed my skills in deploying applications on AWS, where I utilized services such as Lambda and S3 to enhance scalability and performance. Additionally, while interning at Tech Solutions, I collaborated with a team of engineers to optimize a microservices architecture, resulting in a 30% reduction in response time and improved overall user satisfaction. These experiences have equipped me with the technical skills and problem-solving abilities necessary for a role as a Platform Engineer.

I am particularly drawn to Acme Corporation's commitment to fostering innovation through cutting-edge technologies. I am eager to bring my background in software development alongside my knowledge of platform engineering best practices to contribute to your team. I am confident that my proactive approach and dedication to continuous learning would allow me to thrive in this role.

I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application. I hope to speak with you soon.

Sincerely,

Jordan Taylor
