Acme Corporation

RE: Entry Level Ruby Developer

Dear Hiring Manager,

I am excited to apply for the Entry Level Ruby Developer position at Acme Corporation, as advertised on your careers page. With a strong foundation in Ruby programming and a passion for crafting efficient, scalable applications, I am eager to contribute to your innovative team and help drive impactful solutions for your clients.

During my academic career at State University, where I earned a Bachelor's degree in Computer Science, I completed several projects that honed my Ruby development skills. One notable achievement was developing a web-based inventory management system for a local startup using Ruby on Rails. This project not only improved their operational efficiency by 30% but also provided me with hands-on experience in using frameworks, version control systems, and agile methodologies. Furthermore, I interned with Tech Solutions, where I collaborated with a team to build a customer feedback application that integrated with existing Ruby APIs. This experience taught me the importance of user-centered design and the value of writing clean, maintainable code.

I am particularly drawn to Acme Corporation because of your commitment to leveraging technology to solve real-world problems. I am enthusiastic about the opportunity to work with a talented team that shares my passion for Ruby development. I am confident that my proactive approach to problem-solving and eagerness to learn will allow me to contribute positively to your projects.

I would love the chance to discuss how my background, skills, and enthusiasm align with the goals of Acme Corporation. Thank you for considering my application. I look forward to the opportunity to speak with you further about joining your team.

Sincerely,

Jordan Smith
