Acme Corporation

RE: Entry Level Scala Developer

Dear Hiring Manager,

I am excited to apply for the Entry Level Scala Developer position at Acme Corporation, which I discovered on your careers page. With a solid foundation in software development and a passion for functional programming, I am eager to contribute to your team and help drive innovative solutions at Acme.

During my time at university, I completed a capstone project where I developed a web application using Scala and Play Framework. This project not only honed my programming skills but also taught me the importance of collaboration and Agile methodologies. Additionally, I interned at a tech startup, where I was part of a team that created a real-time data processing system using Apache Spark with Scala. My contributions included optimizing data pipelines, which resulted in a 30% improvement in processing speed. These experiences have equipped me with a strong understanding of Scala and its application in solving complex problems.

I am particularly drawn to Acme Corporation because of your commitment to leveraging cutting-edge technology to deliver exceptional products. I am eager to further develop my skills in Scala and work alongside experienced developers to contribute to innovative projects. I would love the opportunity to discuss how my background and enthusiasm for programming can align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Lee Thompson
