Acme Corporation

RE: Entry Level Swift Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level Swift Developer position at Acme Corporation, which I discovered through your careers page. With a solid foundation in Swift programming and a passion for developing innovative mobile applications, I am eager to contribute to your team and help create exceptional user experiences.

During my time at university, I successfully completed a capstone project where I developed a mobile application for managing personal finances. This application was built using Swift and incorporated features such as user authentication, data visualization, and an intuitive user interface. I received positive feedback from both my peers and instructors for its functionality and design, which sparked my desire to pursue a career in mobile development. Additionally, I interned at a local tech startup where I collaborated with senior developers to enhance an existing iOS application. My contributions included optimizing code for performance and implementing new features based on user feedback, resulting in a 20% increase in user engagement.

I am excited about the opportunity to further discuss how my background in Swift development aligns with the goals of Acme Corporation. I am particularly drawn to your commitment to innovation and excellence, and I believe that my skills will complement your team well. Thank you for considering my application; I look forward to the possibility of contributing to your exciting projects.

Sincerely,

Jordan Taylor
