Acme Corporation

RE: Entry Level Technical Architect

Dear Hiring Manager,

Dear Hiring Manager,

I am excited to apply for the Entry Level Technical Architect position at Acme Corporation, which I discovered on LinkedIn. With a strong foundation in software development and architecture principles, I am eager to contribute to your team and help drive innovative solutions that meet client needs.

During my internship at Tech Solutions Inc., I played a pivotal role in a project aimed at redesigning a web application for a major client. I collaborated with a team of developers to implement a microservices architecture, which improved the application's scalability by 40% and reduced downtime. This experience not only sharpened my technical skills in cloud platforms such as AWS but also taught me the importance of aligning technical solutions with business goals. Additionally, I led a college project where we developed a mobile application using React Native. I was responsible for the architecture and design, ensuring that the app was user-friendly and met all functional requirements, resulting in a project that earned top marks in our course.

I am particularly drawn to Acme Corporation's commitment to leveraging cutting-edge technology to solve complex problems. I believe my proactive approach to learning and my passion for technology align well with the innovative culture at Acme. I would welcome the opportunity to discuss how my background, skills, and enthusiasms can contribute to your team. Thank you for considering my application; I look forward to the possibility of discussing this exciting opportunity with you further.

Sincerely,

Jordan Smith
