Acme Corporation

RE: Entry Level Ux Researcher

Dear Hiring Manager,

I am writing to express my enthusiasm for the Entry Level UX Researcher position at Acme Corporation, which I discovered through your company's careers page. With a background in psychology and hands-on experience in user research, I am excited about the opportunity to contribute to your team and help design user-centered experiences that resonate with your audience.

During my time at university, I led a project focused on improving the user experience of a local nonprofit's website. Through user interviews and usability testing, I identified key pain points that were hindering user engagement. By implementing design recommendations based on user feedback, we increased the website's usability score by 40% within two months. Additionally, I completed an internship at a tech startup where I conducted market research and analyzed user data to inform product development. My insights directly contributed to a 25% increase in user retention after the launch of their new app feature.

I am particularly drawn to Acme Corporation due to its commitment to innovation and excellence in user experience design. I would welcome the opportunity to further discuss how my background, skills, and passion for user research can contribute to your team. Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you.

Sincerely,

Jordan Lee Thompson
