Acme Corporation

RE: Freelance To Full Time Backend Developer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Backend Developer position at Acme Corporation, which I found on your company's careers page. With a strong background in backend development and a proven track record of delivering high-quality solutions for diverse clients, I am eager to contribute to your team and help drive your projects to success.

During my freelance career, I successfully developed a microservices architecture for an e-commerce platform that resulted in a 30% increase in load speed and improved scalability. This project not only enhanced the user experience but also allowed the client to handle a larger volume of transactions during peak times. Additionally, I spearheaded the migration of a legacy system to a cloud-based solution for a financial services client, which reduced their operational costs by 40% and improved system reliability. These experiences have honed my expertise in Python and Node.js, as well as my ability to collaborate closely with cross-functional teams to deliver impactful solutions.

I am particularly drawn to Acme Corporation because of your commitment to innovation and quality in software development. I believe my skills in optimizing backend systems and my proactive approach to problem-solving would be a great fit for your team. I am eager to bring my freelance experience to a full-time role and further develop my skills within a collaborative environment.

I would love the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application; I look forward to the possibility of contributing to your esteemed team.

Sincerely,

Jordan Smith
