Acme Corporation

RE: Freelance To Full Time Devops Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Devops Engineer position at Acme Corporation, which I discovered on your careers page. With a strong freelance background in DevOps practices and a passion for optimizing deployment pipelines, I am eager to bring my skills to a dynamic team like yours.

Over the past three years, I have successfully transitioned several clients from traditional development practices to fully integrated DevOps environments. For instance, while working with a SaaS startup, I implemented a CI/CD pipeline using Jenkins and Docker, which reduced their deployment time by 70%. Additionally, I led a project where I migrated a legacy system to a microservices architecture on AWS, resulting in improved scalability and a 50% reduction in operational costs. My hands-on experience with cloud platforms, containerization, and automation tools positions me well to contribute to Acme Corporation's objectives.

I am particularly drawn to this opportunity at Acme Corporation because of your commitment to innovation and excellence in technology solutions. I am eager to discuss how my background as a freelance DevOps engineer can translate into long-term success for your team. Thank you for considering my application; I look forward to the possibility of contributing to your organization.

Sincerely,

Jordan Mitchell
