Acme Corporation

RE: Freelance To Full Time Devsecops Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Devsecops Engineer position at Acme Corporation, which I discovered on LinkedIn. With a robust background in both development and security operations, I believe my skills align perfectly with the innovative environment at Acme Corporation, and I am eager to contribute my expertise to your dynamic team.

During my freelance career, I successfully implemented a CI/CD pipeline for a leading fintech client that reduced deployment times by over 40%. By integrating security scans directly into the pipeline, I ensured that code vulnerabilities were identified and remediated prior to production deployment, resulting in a 30% decrease in security incidents. This experience not only honed my technical skills in tools such as Jenkins and Docker but also taught me the importance of fostering collaboration between development, security, and operations teams.

Additionally, I led a project to automate infrastructure provisioning using Terraform, which improved deployment consistency and reduced configuration drift. By establishing best practices and conducting training sessions for the client's development team, I ensured a seamless transition to a more secure and efficient operating model. I am particularly proud of this initiative as it not only demonstrated my technical capabilities but also my commitment to empowering others in the organization to prioritize security in their workflows.

I am very interested in the opportunity to discuss how my freelance experience and achievements can translate into value for Acme Corporation. Thank you for considering my application; I look forward to the possibility of discussing my candidacy in more detail.

Sincerely,

Jordan Mitchell
