Acme Corporation

RE: Freelance To Full Time Electrical Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Electrical Engineer position at Acme Corporation, which I discovered on your careers page. With over five years of freelance experience in electrical engineering, I have honed my skills in project management and technical design, and I am eager to contribute to a forward-thinking team like yours.

During my time as a freelance engineer, I successfully led a project for a renewable energy startup that resulted in a 30% increase in energy efficiency through innovative circuit design. By conducting thorough analysis and simulations, I was able to optimize the existing systems, which not only saved the client significant costs but also enhanced their sustainability profile. Additionally, I collaborated with cross-functional teams to design a state-of-the-art electrical system for a commercial building, which was completed two weeks ahead of schedule and under budget. This experience equipped me with the ability to adapt to different environments while maintaining high engineering standards.

I am particularly impressed with Acme Corporation's commitment to innovation and sustainability in electrical engineering. I am eager to bring my unique expertise in both freelance and project-based work to your team, contributing to groundbreaking projects that align with your vision. I would love the opportunity to discuss how my background and skills can help advance your goals further. Thank you for considering my application; I look forward to the possibility of discussing this exciting opportunity with you.

Sincerely,

Jordan Mitchell
