Acme Corporation

RE: Freelance To Full Time Embedded Systems Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Embedded Systems Engineer position at Acme Corporation, which I discovered on LinkedIn. With over five years of experience in embedded systems development and a proven track record of delivering high-quality solutions, I am eager to bring my expertise to your team and contribute to your innovative projects.

During my freelance career, I successfully developed a custom embedded system for a robotics startup that improved their product efficiency by 30%. By optimizing the firmware and implementing real-time data processing, I helped the team reduce latency and enhance user experience. Additionally, I led a project for a medical device company where I designed a low-power embedded system that not only met regulatory standards but also received praise for its reliability and performance in critical applications. These experiences have equipped me with strong problem-solving skills and a deep understanding of both hardware and software integration in embedded systems.

I am particularly drawn to Acme Corporation due to its commitment to innovation and excellence in engineering. I believe my skills align well with your goals, and I would love the opportunity to discuss how my background and experience can contribute to your team. Thank you for considering my application; I look forward to the possibility of discussing this exciting opportunity with you.

Sincerely,

Jordan M. Reynolds
