Acme Corporation

RE: Freelance To Full Time Firmware Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Firmware Engineer position at Acme Corporation, as advertised on LinkedIn. With over five years of experience in developing embedded systems and writing efficient firmware, I am eager to transition my freelance career into a full-time role where I can contribute to innovative projects that drive your company's mission forward.

During my freelance tenure, I successfully designed and implemented a real-time firmware solution for a medical device that improved data processing speed by 30% while ensuring compliance with industry standards. This project not only honed my skills in C and assembly language but also enhanced my ability to collaborate with cross-functional teams to meet project deadlines. Additionally, I developed a power management firmware for an IoT application that extended battery life by 40%, resulting in significant cost savings for my client and increased customer satisfaction.

I am particularly drawn to Acme Corporation's commitment to pioneering technologies and the emphasis you place on innovation. I believe my background in firmware development aligns well with your team's objectives, and I am keen to leverage my experience to contribute to your projects. I would be thrilled to discuss how my skills and experiences can support your engineering goals and help drive Acme Corporation's success. Thank you for considering my application; I look forward to the opportunity to speak with you further.

Sincerely,

Jordan T. Anderson
