Acme Corporation

RE: Freelance To Full Time Hardware Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Hardware Engineer position at Acme Corporation, as advertised on LinkedIn. With a strong background in electronic design and a proven track record of delivering innovative hardware solutions, I am eager to bring my expertise to your team and contribute to the exciting projects at Acme.

During my freelance career, I successfully designed and implemented a high-performance embedded system for a start-up that resulted in a 30% increase in processing speed compared to their previous model. This project involved extensive collaboration with both software developers and product managers, ensuring that the hardware was optimally designed to meet the software requirements. Additionally, I led the redesign of a consumer electronics product's power management system, which not only reduced production costs by 15% but also improved the overall energy efficiency of the device, resulting in positive feedback from end-users and a significant boost in sales.

I am particularly drawn to Acme Corporation because of your commitment to innovation and quality in hardware development. I am eager to contribute my skills in circuit design, prototyping, and testing to your projects. I believe that my hands-on experience and results-driven approach would make me a valuable addition to your engineering team. I would appreciate the opportunity to further discuss how I can support your goals and contribute to the future successes of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan C. Thompson
