Acme Corporation

RE: Freelance To Full Time Infrastructure Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Infrastructure Engineer position at Acme Corporation, which I discovered on your careers page. With a strong background in infrastructure design and implementation, coupled with my freelance experience, I am eager to bring my skills to your team and contribute to your projects' success.

During my time as a freelance infrastructure engineer, I successfully led a project for a mid-sized tech company that involved migrating their legacy systems to a cloud-based architecture. This transition improved their operational efficiency by 30% and reduced costs by over 20%. Additionally, I designed and implemented a robust disaster recovery plan for an e-commerce client that ensured zero downtime during a critical system upgrade, showcasing my ability to manage high-pressure situations effectively. My hands-on experience with tools like Terraform and AWS CloudFormation has allowed me to automate processes that saved my clients both time and resources.

I am particularly impressed by Acme Corporation's commitment to innovation and quality, and I believe that my background aligns well with your goals. I am looking forward to the opportunity to discuss how my experience and skills can add value to your team. Thank you for considering my application; I hope to speak with you soon.

Sincerely,

Jordan Thompson
