Acme Corporation

RE: Freelance To Full Time Linux Administrator

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Linux Administrator position at Acme Corporation, which I discovered on your careers page. With over five years of freelance experience managing Linux servers and systems, I am eager to bring my expertise to your team and contribute to your innovative projects.

In my freelance career, I have successfully implemented a series of automation scripts that reduced server deployment time by 40%, allowing clients to scale rapidly without sacrificing performance. Additionally, I spearheaded a migration project for a mid-sized tech firm, transitioning their infrastructure from on-premises servers to a cloud-based solution. This project not only optimized their resource usage but also improved their uptime by 30%, directly contributing to enhanced customer satisfaction and retention.

Moreover, I have a proven track record of proactively monitoring system performance and resolving issues before they escalate. For instance, I developed a robust monitoring system using Nagios that alerted me and my clients of potential bottlenecks in real-time, significantly decreasing downtime and increasing overall efficiency. I am passionate about continuous improvement and staying updated with the latest technologies, which I believe aligns with Acme Corporation's commitment to innovation.

I am genuinely interested in the opportunity to discuss how my skills and experiences align with the needs of your team. Thank you for considering my application; I look forward to the possibility of contributing to Acme Corporation's success.

Sincerely,

Jordan T. Miller
