Acme Corporation

RE: Freelance To Full Time Mechanical Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Mechanical Engineer position at Acme Corporation, which I discovered on LinkedIn. With a solid background in mechanical engineering and a successful track record of freelance projects, I am eager to contribute my skills and expertise to your innovative team.

Over the past three years as a freelance mechanical engineer, I have successfully designed and implemented solutions for various clients in the renewable energy sector. One notable project involved collaborating with a startup to develop a prototype for a solar-powered water purification system. I led the design phase, utilizing SolidWorks to create detailed schematics, which resulted in a functional model that reduced production costs by 20% while improving efficiency. Additionally, I partnered with a local manufacturing firm to streamline their production processes, which enhanced their output by 30% and significantly reduced material waste.

I am particularly drawn to this full-time opportunity at Acme Corporation because of your commitment to advancing sustainable technologies. I am eager to bring my experience in project management and innovative engineering solutions to your team. I am confident that my proactive approach and attention to detail will be valuable assets in driving projects forward and meeting tight deadlines. I would welcome the chance to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Taylor
