Acme Corporation

RE: Freelance To Full Time Release Engineer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Release Engineer position at Acme Corporation, which I discovered on your careers page. With a robust background in software development and release management, I am eager to bring my expertise to your team and contribute to your innovative projects.

In my previous role as a Freelance Release Engineer, I successfully led the deployment of over 20 high-impact software releases for various clients, including a major e-commerce platform that experienced a 30% increase in performance post-deployment. By implementing automated release pipelines using Jenkins and Docker, I reduced release times by 40%, enabling faster delivery of features and updates. Additionally, I played a key role in designing a CI/CD framework that improved collaboration between development and operations, significantly minimizing deployment errors and enhancing system reliability.

I am particularly drawn to Acme Corporation's commitment to cutting-edge technology and continuous improvement. I am eager to contribute my skills in release planning, automation, and team collaboration to help streamline processes and improve overall product quality. I would love the opportunity to discuss how my experience aligns with your needs and how I can add value to your team.

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you in more detail.

Sincerely,

Jordan A. Thompson
