Acme Corporation

RE: Freelance To Full Time Ruby Developer

Dear Hiring Manager,

I am excited to apply for the Freelance To Full Time Ruby Developer position at Acme Corporation, which I discovered through LinkedIn. With over five years of experience in Ruby on Rails development, I am confident in my ability to contribute effectively to your team and help drive innovative solutions. My background in developing scalable web applications aligns perfectly with Acme's commitment to delivering high-quality products.

During my time as a freelance developer, I successfully completed a project for a startup where I built a custom e-commerce platform using Ruby on Rails. The platform not only improved their transaction processing speed by 30%, but it also enhanced user engagement through a streamlined interface, resulting in a 25% increase in sales within the first quarter post-launch. Furthermore, I developed a robust API for a health tech company that integrated seamlessly with third-party services, improving data retrieval times by 40% and significantly enhancing the user experience. These experiences have honed my problem-solving skills and deepened my understanding of efficient coding practices, particularly in Ruby.

I am eager to bring my technical skills and passion for Ruby development to the team at Acme Corporation. I believe that my freelance experience has equipped me with a unique perspective and adaptability that will be valuable in a full-time role. I look forward to the possibility of discussing how I can contribute to your projects and help Acme continue to innovate. Thank you for considering my application.

Sincerely,

Jordan Lee Thompson
