Acme Corporation

RE: Internship Audio Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Audio Engineer position at Acme Corporation, as advertised on your careers page. As a passionate audio engineering student at the University of Arts, I have developed a solid foundation in sound design and production techniques, and I am eager to contribute my skills to your innovative team.

In my recent project at university, I collaborated with a team to design soundscapes for a short film, where I was responsible for recording and mixing audio to enhance the storytelling. By utilizing Pro Tools and various field recording techniques, we achieved a 30% increase in audience engagement during our screening, as noted in feedback surveys. Additionally, I interned at a local recording studio, where I assisted in the production of several independent music projects. My contributions included setting up equipment, managing session logistics, and refining mixes based on artist feedback, which resulted in two tracks being picked up by a regional radio station.

I am particularly drawn to Acme Corporation due to your commitment to pushing the boundaries of audio technology and your collaborative environment. I am eager to bring my technical skills and creative approach to your team and learn from industry-leading professionals. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your projects and grow within your esteemed organization.

Sincerely,

Jordan Ellis
