Acme Corporation

RE: Internship Automation Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Automation Engineer position at Acme Corporation, as advertised on your careers page. With a strong foundation in software development and a passion for automation, I am excited about the opportunity to contribute to your innovative projects and help streamline processes at Acme Corporation.

During my coursework in Computer Engineering at State University, I completed a project where I designed and implemented a test automation framework for a web application, which reduced the testing time by 40%. This hands-on experience allowed me to work with tools such as Selenium and JUnit, and I gained valuable insights into the software development lifecycle. Furthermore, as a member of the university's robotics team, I played a crucial role in automating the control systems of our robot, which improved our operational efficiency during competitions and led us to win the regional championship. These experiences have equipped me with the technical skills and problem-solving abilities that I believe are essential for success in this internship.

I am particularly drawn to Acme Corporation because of its commitment to innovation and excellence in automation solutions. I am eager to bring my skills and fresh perspective to your team while learning from the talented engineers at your company. I am confident that my background and dedication to improving processes align well with the goals of Acme Corporation.

I look forward to the opportunity to further discuss how my skills and experiences align with the needs of your team. Thank you for considering my application for the Internship Automation Engineer position. I hope to contribute to the exciting work at Acme Corporation and am eager to learn more about your projects.

Sincerely,

Jordan Smith
