Acme Corporation

RE: Internship Backend Developer

Dear Hiring Manager,

I am excited to apply for the Internship Backend Developer position at Acme Corporation, as advertised on your careers page. With a strong passion for backend development and a desire to contribute to innovative projects, I believe my skills and experiences align well with the goals of your team.

During my studies at the University of Technology, I successfully completed a software engineering project where I designed and implemented a RESTful API for a mobile application used by students on campus. This experience not only honed my skills in Java and Spring Boot but also taught me the importance of creating efficient, scalable systems. Furthermore, I interned at a local startup where I collaborated with a team to optimize their existing database queries, resulting in a 30% reduction in load times. This achievement reinforced my understanding of database management and the critical role it plays in backend development.

I am particularly drawn to Acme Corporation due to your commitment to leveraging technology for solving real-world problems. I am eager to bring my background in software development and my proactive approach to your team. I would appreciate the opportunity to discuss how I can contribute to your projects and learn from the talented engineers at Acme. Thank you for considering my application.

Sincerely,

Jordan Smith
