Acme Corporation

RE: Internship Boilermaker

Dear Hiring Manager,

I am excited to apply for the Internship Boilermaker position at Acme Corporation, as advertised on your company's careers page. With a strong passion for metalwork and a commitment to safety and quality, I believe I would be a valuable addition to your skilled team. The opportunity to work with a leading company in the industry is thrilling, and I am eager to contribute my skills while learning from experienced professionals.

During my time at the local technical college, I completed a hands-on training program in welding and fabrication, where I honed my skills in interpreting blueprints and executing precise welds. I was able to lead a team project where we designed and fabricated a custom metal structure, ensuring adherence to safety protocols and timelines. This experience not only enhanced my technical abilities but also taught me the importance of teamwork and effective communication in a workshop environment.

Additionally, I participated in a summer program where I shadowed a certified boilermaker. I gained first-hand experience in assembling and repairing boilers, which deepened my understanding of the technical requirements of the job. My commitment to quality and thoroughness helped the team meet critical deadlines while maintaining exceptional standards of workmanship. I am eager to bring this dedication and my growing expertise to the internship at Acme Corporation.

I would love the opportunity to discuss how my background and skills align with the goals of Acme Corporation. Thank you for considering my application. I look forward to the possibility of contributing to your team and furthering my career in boilermaking.

Sincerely,

Jordan M. Stevens
