Acme Corporation

RE: Internship Chemist

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Chemist position at Acme Corporation, as advertised on your careers page. With a strong background in chemistry and a keen interest in applying my skills in a professional setting, I am excited about the opportunity to contribute to your team and learn from industry leaders in the field.

During my studies at the University of Science, I successfully completed a project focused on the synthesis of biodegradable polymers, which received recognition at the National Chemistry Conference. This experience not only enhanced my laboratory skills but also deepened my understanding of sustainable materials, aligning with Acme's commitment to environmentally-friendly practices. Additionally, I interned at Innovative Labs, where I assisted in developing a new analytical method for determining the concentration of active ingredients in pharmaceuticals, resulting in a 20% increase in efficiency in quality control processes.

I am particularly drawn to this internship because of Acme Corporation's reputation for innovation and excellence in chemical research. I am eager to bring my passion for chemistry and my proactive approach to problem-solving to your team. I look forward to the possibility of discussing how my background, skills, and enthusiasm for chemistry can contribute to the objectives of Acme Corporation. Thank you for considering my application.

Sincerely,

Emily Johnson
