Acme Corporation

RE: Internship Cloud Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Cloud Engineer position at Acme Corporation, which I discovered on your careers page. As a current Computer Science student at State University with a strong focus on cloud computing and software development, I am excited about the opportunity to apply my skills and contribute to your innovative projects in cloud infrastructure.

Throughout my academic journey, I have actively engaged in several projects that align with the responsibilities of this internship. Most notably, I developed a cloud-based application using AWS services, which significantly improved the deployment speed for a local startup by 30%. This experience not only honed my technical skills in AWS Lambda and EC2 but also taught me the importance of optimizing resources for cost efficiency and scalability. Additionally, my recent internship at Tech Solutions allowed me to collaborate with a team to implement a microservices architecture, which enhanced application performance and reduced downtime. My ability to work effectively in a team and adapt to new technologies was crucial in successfully delivering this project ahead of schedule.

I am eager to bring my background in cloud technologies and my proactive approach to problem-solving to the talented team at Acme Corporation. I am particularly drawn to your commitment to fostering innovation and excellence in cloud solutions, and I believe my skills would make a meaningful contribution. I would appreciate the opportunity to discuss how I can support your goals and further develop my expertise in cloud engineering. Thank you for considering my application.

Sincerely,

Jordan Lee Thompson
