Acme Corporation

RE: Internship Devops Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Devops Engineer position at Acme Corporation, which I discovered on your careers page. With a strong foundation in software development and a keen interest in automation and cloud technologies, I am eager to contribute to your team's innovative projects and learn from industry leaders in a dynamic environment.

During my recent internship at Tech Innovations, I successfully collaborated with a team to deploy a containerized web application using Docker and Kubernetes, reducing deployment times by 40%. I took the initiative to implement CI/CD pipelines using Jenkins, which streamlined our development process and resulted in a 30% decrease in bugs reported post-deployment. My coursework in cloud computing has also equipped me with hands-on experience in AWS, where I designed and managed scalable infrastructure that supported a web application serving over 1,000 daily users.

I am particularly impressed by Acme Corporation's commitment to utilizing cutting-edge technologies and fostering a culture of continuous improvement. I am eager to bring my proactive approach and problem-solving skills to your team, contributing to the efficiency and reliability of your systems while further developing my skills in a professional setting. Thank you for considering my application. I look forward to the opportunity to discuss how I can add value to Acme Corporation.

Sincerely,

Jordan Lee Thompson
