Acme Corporation

RE: Internship Devsecops Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Devsecops Engineer position at Acme Corporation, as advertised on your careers page. With a strong foundation in software development and a keen interest in security practices, I am eager to contribute to your team and further develop my skills in a dynamic environment.

During my time at university, I successfully led a team project in which we developed a web application that integrated automated security testing within the CI/CD pipeline. I implemented tools like OWASP ZAP and SonarQube, resulting in a 40% reduction in security vulnerabilities identified during the development phase. Additionally, I interned at Tech Innovations, where I assisted in deploying containerized applications with Docker and Kubernetes. This hands-on experience taught me the importance of security in container orchestration and led to the implementation of security best practices that improved our deployment workflow significantly.

I am particularly drawn to Acme Corporation due to your commitment to innovation and security in the software development lifecycle. I am eager to bring my background in both development and security to your team, and I am enthusiastic about the opportunity to learn from experienced professionals in the field. I would welcome the chance to discuss how my skills and experiences align with the goals of Acme Corporation and explore how I can contribute to your projects.

Thank you for considering my application. I look forward to the opportunity to discuss my candidacy further and to learn more about the exciting work being done at Acme Corporation.

Sincerely,

Jordan Thompson
