Acme Corporation

RE: Internship Food Scientist

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Food Scientist position at Acme Corporation, which I discovered through my university's career services. With a strong academic foundation in food science and a passion for innovative food solutions, I am excited about the opportunity to contribute to your team and learn from industry leaders.

During my studies at the University of California, Davis, I successfully led a capstone project focused on developing a plant-based protein product. This experience not only honed my skills in formulation and sensory evaluation, but it also resulted in a product that won first place at the campus-wide Food Innovation Challenge. Additionally, I completed an internship with Fresh Foods Co., where I assisted in conducting quality assurance tests, analyzing nutritional content, and optimizing preservation techniques. My hands-on experience in a fast-paced food production environment equipped me with a thorough understanding of food safety regulations and quality control measures.

I am particularly drawn to Acme Corporation due to its commitment to sustainability and innovation in food products. I am eager to bring my analytical skills and creative problem-solving abilities to your team, collaborating on projects that align with your vision of enhancing food quality and safety while promoting environmental responsibility. I firmly believe that my background in food science and my proactive approach to learning will allow me to contribute meaningfully during my internship.

I would be grateful for the opportunity to discuss my application further and explore how I can support the goals of Acme Corporation as a dedicated intern. Thank you for considering my application; I look forward to the possibility of contributing to your team.

Sincerely,

Jordan Lee Thompson
