Acme Corporation

RE: Internship Frontend Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Frontend Developer position at Acme Corporation, as advertised on your careers page. With a strong foundation in web development and a passion for creating user-friendly interfaces, I am eager to contribute my skills and learn from your talented team.

During my recent project at university, I successfully developed a responsive web application using React that streamlined the user experience for students accessing course materials. This project not only honed my skills in JavaScript and CSS but also taught me the importance of collaboration, as I worked closely with designers to ensure our vision aligned with user feedback. Additionally, I completed an internship at XYZ Tech, where I optimized a web application by implementing code-splitting techniques that improved load times by over 30%. This experience reinforced my commitment to performance and usability in frontend development.

I am particularly drawn to Acme Corporation's focus on innovation and quality in product development. I am excited about the opportunity to engage with your team and bring my strong analytical skills and attention to detail into your projects. I believe that my background in frontend technologies and my eagerness to learn will make me a valuable addition to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the exciting projects at Acme Corporation and further develop my skills as a frontend developer.

Sincerely,

Jordan Smith
