Acme Corporation

RE: Internship Go Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Go Developer position at Acme Corporation, which I discovered on your careers page. As a computer science student with a strong foundation in software development and a keen interest in Go programming, I am excited about the opportunity to contribute to your innovative projects and collaborate with your talented team.

During my academic career, I successfully completed a project where I developed a RESTful API using Go that streamlined the data retrieval process for a local non-profit organization. This project not only honed my skills in Go but also helped improve the organization's efficiency by 30%, demonstrating my ability to deliver practical solutions to real-world problems. Additionally, I interned at a tech startup where I participated in a team that implemented a microservices architecture, allowing for increased scalability and resilience in our applications. My direct involvement in developing several microservices in Go equipped me with hands-on experience and a deeper understanding of the Go ecosystem.

I am particularly drawn to Acme Corporation because of its commitment to leveraging cutting-edge technology to drive business solutions. I am eager to bring my technical skills and collaborative spirit to your team and contribute to your ongoing success. I would welcome the opportunity to discuss how my background and interests align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Lee Miller
