Acme Corporation

RE: Internship Java Developer

Dear Hiring Manager,

I am excited to apply for the Internship Java Developer position at Acme Corporation, which I discovered through my university's career services portal. As a computer science student at State University, I have developed a strong foundation in programming, particularly in Java, and I am eager to contribute to your team while further enhancing my skills in a professional environment.

During my academic career, I completed a project where I developed a Java-based inventory management system, which streamlined operations for a local retail store. This project not only reinforced my understanding of object-oriented programming but also improved my ability to collaborate with others, as I worked closely with a team of three to successfully implement features such as automated stock tracking and reporting. Additionally, I interned at a tech startup where I assisted in optimizing existing Java applications, resulting in a 20% increase in performance efficiency. This experience taught me the importance of writing clean, maintainable code and gave me hands-on exposure to agile development methodologies.

I am particularly drawn to the opportunity at Acme Corporation due to your commitment to innovation and your focus on developing cutting-edge solutions. I am eager to bring my technical skills and passion for software development to your team, and I am confident that my proactive approach and ability to learn quickly would make a positive impact on your ongoing projects. I would greatly appreciate the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation.

Thank you for considering my application. I look forward to the possibility of discussing this exciting opportunity with you soon.

Sincerely,

Sophia Martinez
