Acme Corporation

RE: Internship Marine Engineer

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Marine Engineer position at Acme Corporation, as advertised on your careers page. With a strong background in marine engineering principles and hands-on experience in related projects, I am excited about the opportunity to contribute to your innovative marine solutions team.

During my studies at the University of California, Berkeley, I participated in a capstone project where we designed a small-scale autonomous underwater vehicle. This project not only honed my technical skills in CAD software and fluid dynamics but also taught me the importance of collaborative problem-solving. Our team's design was recognized for its efficiency, ultimately placing first in a university-wide engineering competition. Additionally, I completed an internship with OceanTech, where I assisted in the maintenance and repair of marine engines. This experience provided me with practical insights into engine performance metrics and the significance of adhering to safety standards in maritime operations.

I am particularly drawn to Acme Corporation's commitment to sustainability and innovation in marine engineering. I am eager to bring my skills in design analysis and project management to your team. I would appreciate the opportunity to discuss how my background, skills, and enthusiasm align with the goals of Acme Corporation. Thank you for considering my application; I look forward to the possibility of contributing to your remarkable projects.

Sincerely,

Jordan A. Wright
