Acme Corporation

RE: Internship Packaging Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Packaging Engineer position at Acme Corporation, as advertised on your careers page. With a strong foundation in packaging design and a passion for sustainable solutions, I believe my skills and experiences align perfectly with the goals of your team. Acme Corporation's commitment to innovative packaging solutions resonates with my career aspirations, and I am eager to contribute to your projects this summer.

During my time at the University of Michigan, I led a project in my Packaging Engineering course where I designed a biodegradable packaging prototype for a local startup. This project not only honed my technical skills in material selection and design principles but also resulted in a 20% reduction in packaging waste compared to traditional materials. Additionally, I completed an internship at GreenPack Solutions, where I was involved in optimizing packaging processes for efficiency. My contributions led to a 15% decrease in production costs by implementing new automation technologies and redesigning existing packaging formats.

I am particularly drawn to Acme Corporation's initiatives in sustainable packaging and would love the opportunity to contribute to your innovative projects. I am confident that my background in both design and engineering principles, as well as my commitment to sustainability, will allow me to provide valuable insights to your team. I look forward to the possibility of discussing how my skills and experiences can benefit Acme Corporation further.

Thank you for considering my application. I am eager to bring my passion for packaging engineering to Acme Corporation and contribute to your mission of delivering exceptional packaging solutions. I look forward to the opportunity for an interview to discuss my application in greater detail.

Sincerely,

Jordan A. Rivera
