Acme Corporation

RE: Internship Penetration Tester

Dear Hiring Manager,

I am excited to apply for the Internship Penetration Tester position at Acme Corporation, as advertised on your careers page. With a firm foundation in cybersecurity principles and hands-on experience in ethical hacking, I am eager to contribute to your team while further developing my skills in a dynamic industry environment.

During my studies in Computer Science at State University, I led a team project where we simulated a real-world infrastructure attack, successfully identifying and mitigating vulnerabilities in a mock corporate network. This experience not only honed my technical skills in tools such as Burp Suite and Metasploit but also solidified my ability to work collaboratively under pressure. Additionally, I completed a summer internship with CyberSafe Solutions, where I contributed to a vulnerability assessment for a financial client, discovering critical weaknesses that led to the implementation of key security measures, protecting sensitive data for over 10,000 users.

I am particularly impressed by Acme Corporation's commitment to innovation and excellence in cybersecurity. I am eager to bring my analytical skills, attention to detail, and passion for penetrating testing to your team. I believe that my proactive approach to problem-solving and my dedication to staying current with emerging threats will make me a valuable asset to your organization. I would appreciate the opportunity to discuss my application further and explore how I can contribute to the ongoing success of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Taylor
