Acme Corporation

RE: Internship Quantitative Analyst

Dear Hiring Manager,

I am excited to apply for the Internship Quantitative Analyst position at Acme Corporation, which I discovered through my university's career portal. With a strong background in data analysis and financial modeling, I am eager to contribute my skills to your innovative team and support data-driven decision-making processes at Acme.

During my studies at the University of Chicago, I successfully completed a project in which I developed a predictive model for stock price movements using historical data and machine learning techniques. This project not only sharpened my technical skills in Python and R, but it also taught me the importance of interpreting data in a real-world context. Additionally, I interned at a local investment firm where I assisted in analyzing portfolio performance metrics and identifying trends, which led to a 15% improvement in our investment strategy's efficiency. This hands-on experience has provided me with a solid foundation in quantitative analysis and has fueled my passion for leveraging data to drive business outcomes.

I am particularly drawn to Acme Corporation's commitment to innovation and its analytical approach to solving complex business challenges. I am excited about the possibility of bringing my unique perspective and skill set to your team, and I am eager to learn from industry leaders. I would appreciate the opportunity to discuss how my experiences align with the goals of Acme Corporation and how I can contribute to your projects. Thank you for considering my application; I look forward to the possibility of discussing my candidacy further.

Sincerely,

Jordan M. Lee
