Acme Corporation

RE: Internship Research Engineer

Dear Hiring Manager,

I am excited to apply for the Internship Research Engineer position at Acme Corporation, as advertised on your careers page. With a strong background in engineering and a keen interest in research and development, I am eager to contribute to your innovative projects and collaborate with your talented team.

During my academic career at the University of Technology, I successfully led a team project focused on optimizing the efficiency of renewable energy systems. We developed a novel algorithm that improved energy output by 15%, which was recognized at the National Engineering Conference. Additionally, I interned at GreenTech Innovations, where I assisted in data analysis and prototype testing for a new solar panel design. My contributions helped reduce the prototype's production cost by 10%, demonstrating my ability to apply theoretical knowledge to practical applications and my commitment to driving tangible results.

I am particularly drawn to Acme Corporation's commitment to sustainability and innovation in engineering solutions. I am eager to bring my strong analytical skills and hands-on experience to your team, where I believe I can make a meaningful impact. I would be thrilled to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation and further explore how I can contribute to your esteemed organization.

Thank you for considering my application. I look forward to the opportunity to speak with you further about how I can assist your team as an Internship Research Engineer.

Sincerely,

Jordan Smith
