Acme Corporation

RE: Internship Research Scientist

Dear Hiring Manager,

I am writing to express my enthusiasm for the Internship Research Scientist position at Acme Corporation, as advertised on your careers page. With a strong background in biological sciences and a passion for innovative research, I am excited about the opportunity to contribute to your team and further develop my skills in a dynamic environment.

During my time at the University of California, I had the opportunity to lead a research project focusing on the effects of environmental stressors on microbial communities. This project not only honed my laboratory skills, including PCR and gel electrophoresis, but also enhanced my ability to analyze complex data sets. I presented our findings at the annual undergraduate research symposium, where we received positive feedback for our innovative approach. Additionally, I completed an internship at BioTech Innovations, where I collaborated with a team to investigate novel antimicrobial compounds. This experience allowed me to refine my analytical skills and provided me with a comprehensive understanding of research methodologies in a corporate setting.

I am particularly drawn to Acme Corporation because of your commitment to pioneering research that pushes the boundaries of science. I admire your recent advancements in sustainable biotechnology and believe my background aligns well with your mission. I am eager to bring my research experience, analytical skills, and passion for science to your team.

I would love the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application. I look forward to the possibility of contributing to your innovative projects and am excited to discuss this opportunity further.

Sincerely,

Jessica L. Martinez
