Acme Corporation

RE: Internship Ruby Developer

Dear Hiring Manager,

I am excited to apply for the Internship Ruby Developer position at Acme Corporation, which I discovered on your careers page. As a passionate computer science student at State University, I have developed a strong foundation in Ruby programming and am eager to contribute my skills to an innovative team like yours.

During my recent project for a web application development course, I took the lead in designing and implementing a Ruby on Rails application that streamlined the process of managing student assignments. By utilizing RESTful APIs and integrating PostgreSQL for the database, I successfully reduced the response time of the application by 30%. Additionally, I collaborated with a team of five, where I provided mentorship on Ruby best practices and code optimization, resulting in a 25% increase in our overall project efficiency. This experience honed my ability to work collaboratively in a fast-paced environment while delivering high-quality code.

Furthermore, I completed an internship at Tech Solutions, where I contributed to a team developing a customer management tool using Ruby and JavaScript. I was responsible for implementing several features, including user authentication and a real-time notification system, which improved user engagement by 40%. This experience taught me not only technical skills but also the importance of aligning development work with business objectives, a principle I am eager to bring to Acme Corporation.

I am highly enthusiastic about the possibility of joining your team and contributing to the exciting projects at Acme Corporation. I would appreciate the opportunity to discuss how my background, skills, and enthusiasms align with the goals of your team. Thank you for considering my application.

Sincerely,

Jordan Smith
