Acme Corporation

RE: Internship Security Analyst

Dear Hiring Manager,

I am excited to apply for the Internship Security Analyst position at Acme Corporation, as advertised on your careers page. With a keen interest in cybersecurity and a strong academic background in information technology, I am eager to contribute to your team and enhance my practical skills in a real-world setting.

During my studies at State University, I led a project in which we performed a comprehensive security audit of the campus network, identifying critical vulnerabilities that could have been exploited. Our team proposed and implemented several security measures that resulted in a 40% reduction in potential threats, which was presented to the university's IT department. Additionally, I interned at Tech Solutions, where I assisted in analyzing security incidents and developed an incident response plan that improved the response time by 30%. My hands-on experience with security tools and protocols has equipped me with a solid foundation to effectively support Acme Corporation in protecting its digital assets.

I am particularly drawn to Acme Corporation's commitment to innovation in cybersecurity solutions and would be thrilled to bring my analytical skills and proactive approach to your team. I am eager to learn from your experienced professionals and contribute to impactful projects that enhance security measures. I look forward to the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Acme Corporation. Thank you for considering my application.

Sincerely,

Jordan Thompson
